

Action plan submitted by ZEYNEP ERSOY for MEHMET AKİF ERSOY İLKOKULU - 04.01.2021 @ 14:26:29

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › It is important that your ICT services are regularly reviewed, updated and removed if no longer in use. Installing the latest versions and patches often addresses security vulnerabilities without which your services might come under attack. Ensure that this is part of the job description of the ICT coordinator.

Pupil and staff access to technology

- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities. You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Data protection

- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › Your new users are given a standard password and are asked to generate their own password on their first access. Passwords offer unique entry points into the school computing system and some basic rules of password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at www.esafetylabel.eu/group/community/safe-passwords.
Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access" password.

Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is good that you can produce an overview of installed software and their licences in a short time frame with the help of several people. Consider centralising this.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.

Policy

Acceptable Use Policy (AUP)

- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylabel.eu/group/community/school-policy) will provide helpful information.

Reporting and Incident-Handling

- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.
- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

Staff policy

- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This

is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?

Pupil practice/behaviour

- › When discussing eSafety pupils at your school can sometimes provide feedback on the activities. Involve them as much as possible so that the teacher recognises real life issues while the pupils are more engaged.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

Practice

Management of eSafety eSafety in the curriculum

- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › While it is good that you discuss consequences of online actions terms and conditions, online payments and copyright with older pupils, consider discussing these also with young pupils.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on

the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.

- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).

Sources of support

- › All staff should have some responsibility for eSafety. School counsellors, nurses, etc. are all well placed to provide advice and guidance on these issues and should be invited to contribute to developing and regularly reviewing your School Policy. Make the maximum use of their knowledge and skills and consider whether it is appropriate to provide training for them.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?
- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetylabel.eu/group/community/suggestions-for-online-training-courses.
- › It is important that teachers are aware on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. Ensure that all teachers are provided with information of this. Have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
